

# 13) One Eye of the Basilisk Bouncing

Mea culpa, no other or institution is accountable for this student work. Binary information requires Medium as correlation.

**“O MAN OF TWO VISIONS! Close one eye and open the other. Close one to the world and all that is therein, and open the other to the hallowed beauty of the Beloved.” ~Bahá'u'lláh**

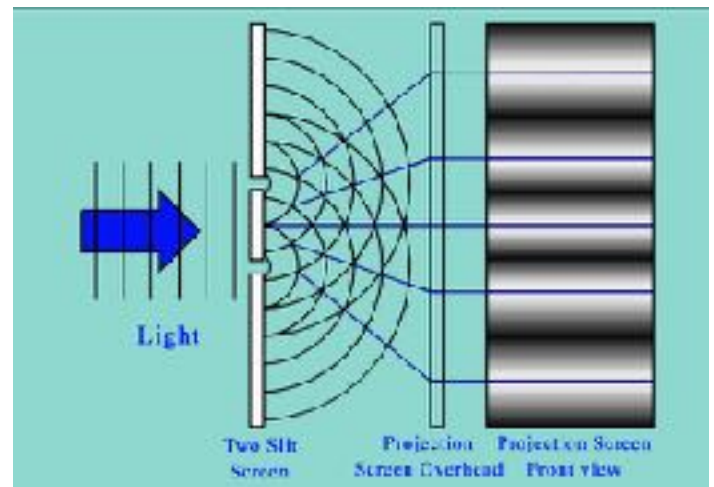

Watch this lizard bobbing its head to bounce its eye simulating binary vision for that eye, interacting fields of high⇌low perspective, to see depth. What is between the lizard's eye and the visual target moves in relation to the target. This visual movement conveys value as distance between. Try it, bob your head to bounce one eye open like the basilisk.

We read the Manifestations, the Divine Teachers, lofty inspiring thoughts and see with Their eye. The next moment, as the world demands, we descend back into the conscious perspective of ego self. Contrasting the two creates a correspondence of information as binary conscious vision.

Binary understanding, choice, is human intelligence as it is with a binary understanding of light. Isaac Newton's introduced light perceived as corpuscles. When we measure light with matter, particles, a photometer or Crooke's radiometer, aka light mill, results demonstrate light's behavior as particles in space. Einstein's earliest paper delineated, how that a photometer was measuring the displacement of electrons with photoelectric effect. The effect is generated by Max Planck's constant providing the quanta, discontinuity, corpuscular packet of energy at emission or absorption of a photon. The Impact of a photon on an electron shifts the electron from its nuclear orbit of an atom creating electric current. The description of mechanism was proof of the particular nature of light.

The Double Slit Experiment imaged below, as early as 1801, expressed light as a wave phenomenon contrasted to Isaac Newton's previous interpretation, circa 1700, that light was a corpuscle, particle.

The dual wave interference of the Double Slit Experiment manifests the wave with destructive diminutive, trough upon crest, and the constructive augmentation, crest upon crest and trough upon trough, by interference of two wave events in time. This correspondence created a static wave event, now, time stopped, projected on the screen beyond the slits. These two contrasting perspectives created a paradox for physicists. Is light a wave, an event in time or object, a particle in space?

**The mind force -- whether we call it pre-existent or contingent -- doth direct and co-ordinate all the members (sensory and limbs) of the human body, seeing to it that each part or member duly performeth its own special function.**

**Selections from the Writings of 'Abdu'l-Bahá, p. 48**

*How now your conscious be, two wills as two waves, Primal and personal, "pre-existent or contingent". Your contingent sensory conscious interacting with the One. These two lights interplay creates the static projection on the wall of your being as the static yet fleeting moment of now to get your true bearings. By physics if you adjust to the frequency, timing of the current purpose, specified by the Manifestation's teachings for this age, alignment will produce a clear image of the path you are on.*

Comparing two slit to one slit measurement with the same apparatus, covering a slit, we observe particle behavior with the single slit. The singularity of discontinuous boundary, single slit, uses the discontinuous nature of space and matter to define light, this yield's result indicating light as particular, discontinuous. When we measure light with light, two slits, continuity with continuity, an event with an event, reference of itself with itself, then the result demonstrates characteristics of a wave, an event in continuous as persistent as static in time. This is one of the essential of the goals of the ancient philosophers, to understand how to see things by its own standard, to see things as they are what they are.

If you examine an event outside of time, it is not an event. It is an object location in space, as is a particle. Zeno's Arrow Paradox is the proof. When he stated the segment of time became shorter and shorter until the arrow was not moving, he re-defined the moving arrow as an object, and not an event. That was the slight of hand. The moving arrow was declared not moving.

How you measure light, with discontinuity or with continuity, matter in space or events in time, determines its behavior, nature, or physics, an discontinuous particle or continuous event.

When you measure with a yard, you get yards; when you measure with particles, you get a particle; when you measure with waves, you get a wave. How do you measure your soul? It is the pure physics of meaning, its essential nature, derived from purpose. This is a meaning of the two slit experiment. Measure your soul, your meaning, your word with the Words, Soul, Meaning of the Manifestation, measure your being with the perfect Being, the Manifestation. The result is a higher understanding than you might expect, as you are the apex of reflective capacity reflecting the divine.

When we measure words by the particular standards of man, we see the thoughts of a particular man. When we measure the Word by Itself we see the Truth, Light. This is the question of quantum. When we measure by quanta, particular, the result is particle. If we measure time with time, event with event, Light with Light, **"dividing each thing according to its kind and showing how it is what it is."** Heraclitus

**Say: O leaders of religion! Weigh not the Book of God with such standards and sciences as are current amongst you, for the Book itself is the unerring Balance established amongst men. In this most perfect Balance whatsoever the peoples and kindreds of the earth possess must be weighed, while the measure of its weight should be tested according to its own standard, did ye but know it. ~Bahá'u'lláh**

When we measure essential meaning by essential meaning, the result is meaning static to itself, out side of space, out sync by time. It projects to the wall of mind a durable eternal relation we stand under, Truth.

Who measures by Purpose is the Primal Will, in that purpose is known to the preexistent Being, *a priori*. We can deduce and measure function as meaning by Their Words to our own soul, only after They reveal. We were created for this reason as we were enlightened by Them *a poster*. They are created and Enlightened *a priori*. Purpose - *a priori*, function as meaning - *a poster*.

**"God has given man the eye of investigation by which he may see and recognize truth. He has endowed man with ears that he may discover things for himself. This is his endowment and equipment for the investigation of reality. Man is not intended to see through the eyes of another, hear through another's ears nor comprehend with another's brain. Each human creature has**

**individual endowment, power and responsibility in the creative plan of God. Therefore, depend on your own reason and judgement and adhere to the outcome of your own investigation; otherwise, you will be bitterly submerged in the sea of ignorance and deprived of all the bounties of God." ~'Abdu'l-Bahá, Promulgation Universal Peace**

When we look with one eye we see particulars of self and others. With the other Eye, the Divine Eye, we see unity of the Divine One; we see the others as self. When we alternate eyes in rapid comparison, bouncing like the basilisk, we can see the divine world as we navigate the world of self. We can see the world of nature with our supra-natural mind, the meaning in binary physics. We can see the distance, the separation to our goal. We are as Bahá'u'lláh indicates a man of two visions. Initially, slowly, alternate, until our binary conscious perceives and remembers the difference. By comparison as equilibrium, augmentative and diminutive interference, we can see "where" we are going in eternal time. We see a static equilibrium image in the moment, an intellectual reality of now. And our comprehension of the world of nature is on the ascent.

Measure our unknown self, by heart, with Bahá'u'lláh's teachings. We see our light augmented. **"O SON OF LIGHT! Forget all save Me and commune with My spirit. This is of the essence of My command, therefore turn unto it."** In one meaning, He conveys our conscious capacity to remember God, pray to, reflect about, open heart to, enjoy purpose in that unity, our free will has the power and capacity to obey.

When we measure by our known self, by ego, by the particulars of the world, we see diminutive selfish animal desires. Sorting us through natural earth bound emotions competing against others for maximum comfort. He calls us "O Man of Two Visions!" We are. "Two eyes are better than one." "Two heads are better than one!" But we need to see with the Eye of the Creator to see the higher path in this world.

One slit, eye, mind, sees single dimension reality space. Two eyes, binary vision, double slits, correspond duality, deeper reality, dimensional meaning. Two slits measure light as event, wave, object in space in time, binary fields, dual meaning. Consultation collaboration correlation reveals greater information.

Read another's thought perspective to understand your own as binary mind. Have conscious examine unconscious; take the Manifestation words or a counsellor as guide or the adventure can get lost in the realm of mystery.

Consultation, the examination of information by self and not self, is binary. The Baha'i writings are replete with the station and powerful transformation, alchemy, of consultation. Bahá'u'lláh, as the Supreme Alchemist, transforms the meaning of a reality to another higher meaning.

**Consultation bestoweth greater awareness and transmuteth conjecture into certitude. It is a shining light which, in a dark world, leadeth the way and guideth. For everything there is and will continue to be a station of perfection and maturity. The maturity of the gift of understanding is made manifest through consultation.**  
~Bahá'u'lláh

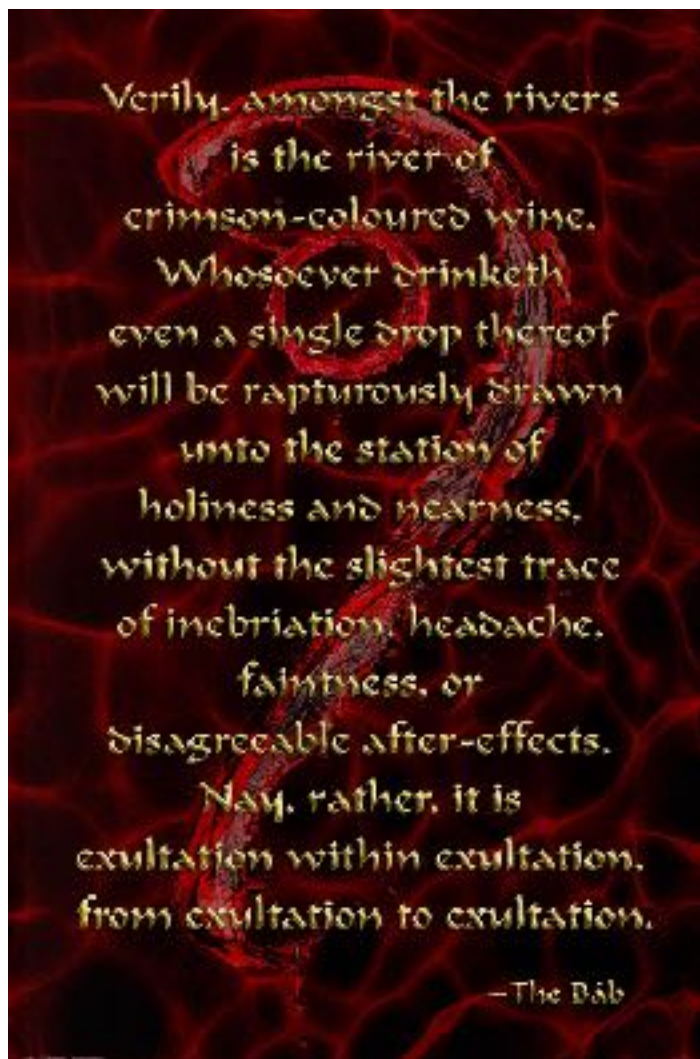

To transmute talking among ourselves to a process and procedure that creates better understanding, knowledge, consultation is now a process mystical, rational, magical, practical, binary-"shining light in a dark world". The Manifestation creates the divine kingdom in this earthly world, binary.

Transform copper to gold at a particle accelerator: Higher power particles to particles know, become, particles that emit light, to measure, beyond measure, to meaning. Wow, imagine what you can do with that kind of power transmuted to knowledge transmuted to service? Thank you nuclear physicist for transcribing relations perceived.

Transform meaning of copper to meaning of gold? Transmute arrogant self into obedient soul. To follow the Kings commands, laws, then by *al-kīmiyā*, the black soil, the soil under our feet transmutes to the kingdom by "betterment of the world" by becoming best self.

This is a meaning of the Twin Slit Experiment, the Light of Truth upon Light of Mystery. The Twin Slits of Light, the Báb's revelation interacting with Bahá'u'lláh's revelation. The Báb, diminutive of Himself before Baha'u'llah, "*This is an epistle from this lowly servant to the All-Glorious Lord — He Who*

*hath been aforetime and will be hereafter made manifest. Verily He is the Most Manifest, the Almighty." Baha'u'llah, augmentative of the Báb, "He is the King of the Messengers and His Book is the Mother Book did ye but know." Light defines light.*

We can see interaction, active force of eternal time as the Primal Will, the Báb's revelation as decree. "It is what It is." Completed circled unity from the Primal Point, to the Primal Will, Baha'u'llah as the recipient. This Day's Sun, the heated love in our hearts, as destiny. "It will be what It will be?" It is the question created by the Báb's ultimate answer. We are the quanta being created by the Light in our rational souls.

Nader Saiedi, In the Gate of the Heart, gifted to us profound glimpses of the Báb's writings and gently presented documentation in context that the revelation of the Báb is completed by the revelation of Bahá'u'lláh. The mode of revelation as laws is the Crimson Wine above. Bahá'u'lláh in the Kitab-i-Aqdas, the book of laws declares:

**Think not that We have revealed unto you a mere code of laws. Nay, rather, We have unsealed the choice Wine with the fingers of might and power. To this beareth witness that which the Pen of Revelation hath revealed. Meditate upon this, O men of insight!**

Binary vision, science with religion, humanity will advance to understand meaning exists outside of space and time and is contained by Divine Purpose.

What say ye, words to deeds? How shine ye, light to particular paralleled by light upon light? The light of the Manifestation upon the light of your particular conscious! This age, the souls of this Day measured by  $C^2$ , truth measured by truth, light measured by light. Oh my thoughtful friend of dual vision, by what standard do you calibrate your sight, your reason, your meaning?

**"Humanity, through suffering and turmoil, is swiftly moving on towards its destiny; if we be loiterers, if we fail to play our part surely others will be called upon to take up our task as ministers to the crying needs of this afflicted world.**

**Not by the force of numbers, not by the mere exposition of a set of new and noble principles, not by an organized campaign of teaching—no matter how worldwide and elaborate in its character—not even by the staunchness of our faith or the exaltation of our enthusiasm, can we ultimately hope to vindicate in the eyes of a critical and sceptical age the supreme claim of the Abhá Revelation. One thing and only one thing will unfailingly and alone secure the undoubted triumph of this sacred Cause, namely, the extent to which our own inner life and private character mirror forth in their manifold aspects the splendor of those eternal principles proclaimed by Bahá'u'lláh. ~Shoghi Effendi**

When we all close one eye for eternity, as has been commanded, may we all choose to see through the other bouncing Eye the Creator has given to us the beautiful meaningful world after this physical womb.

Elderly Baha'i student,  
Clyde Arthur Keys

This student does/can not correctly attribute all of these thoughts. Details get mixed in the blender. None of these thoughts are his. All by way of contemporaries and ancestors. If any came from you, please forgive for repeating them without crediting you for your help. Consider this, mea culpa.
