

## 29) A Solitary Symbol Gifted By Ancient People

Mea culpa, no other or institution is accountable for this student work. The SI units System of International units are a Medium as in physics. They are a universal language for science, universal currency for measuring, for conveying meaning.

**O members of parliaments throughout the world! Select ye a single language for the use of all on earth, and adopt ye likewise a common script. God, verily, maketh plain for you that which shall profit you and enable you to be independent of others. He, of a truth, is the Most Bountiful, the All-Knowing, the All-Informed. This will be the cause of unity, could ye but comprehend it, and the greatest instrument for promoting harmony and civilization, would that ye might understand! ~Bahá'u'lláh, The Kitab-i-Aqdas**

So in following the command of God, unconsciously scientists have selected a

universal language (binary) and in the process of adopting a universal script (symbols). Little they know that doing so is fulfillment of the Primal Will. We will fulfill the Primal Will whether we will to or we will by its Command. That we understand the cause of our actions is a great gift. To be good is a great thing in your life. To be good and know that you're reflecting the good is a better thing. It allows you to see the good comes to you and reflects as opposed to coming from you as creator. Both viewpoints are seeing the good.

The stone spheres were found in the jungles of Costa Rica left by an ancient people. It is unclear exactly what the sphere represent. But they have themselves conveyed unity. The spheres have been associated to each other, possibly indicating astrological events, such as equinox. Others have hypothesis that they are an invitation to divine intervention the way, many symbols have served us as idols and talisman. This student perceives that our ancient fore mothers and fathers were cognitive of the spherical shape of the sun, of the Earth, planets, and possibly things too small to see. There are those who think that the soul has a geometry in non-physical space of a sphere. There are those who proposed that the tetrahedron is the shape of being.

That human beings will associate shapes that have beauty in their structure, such as spheres, circles, squares, triangles, pyramids, tetrahedrons is the human natural desire to associate good with good.

It is our nature. It is the nature of conscious. *Reason is purposeful meaningful association for the good.* It is an expression of our innate knowledge of our Creator to see the glory in our Creator, and the good in the world and the beauty of the symbols, in our fellow man and in ourselves.

Why do babies smile back at us? Is a profound question. There are those who would attribute survival instinct to that behavior. But when you write a article for bahai-library.com and your soul smiles back at itself pleased with the effort that's not about survival. Evolution occurs because nature is moving towards perfection. We move towards perfection at a much higher degree and rate than nature itself. We can understand our own selves, Nature cannot. The human advancement of understanding human nature and what it means to be human that has occurred in the last 150 years far exceeds anything in the past. This indicates there was something that transformed our capacity. That capacity transformation is a direct evidence that the last revelation is fulfilling its purpose. We were in the oxcart age for 40,000 years and now we've been catapulted into the space age and and beyond. As scientists, we know that by the law of cause-and-effect there was a Cause that transformed our ability, mentality, capacity, even our purpose to know and love of Knowledge  $\Leftrightarrow$  Truth  $\Leftrightarrow$  Good  $\Leftrightarrow$  God. So if these examinations, by this student, was aimed at understanding the cause of gravity, and the cause of inertia, the reality of the cause of human advancement must be included. It is all caused by the Primal Will. So when the Báb says He is the Manifestation of the Primal Will and the Bahá'u'lláh says He is the Manifestation of the Primal Will. We have evidence supporting those claims.

The cleanest, succinct, profound understanding of the spheres are that they

represent unity, and our ancient fore mothers and fathers were waiting for the coming of unity, which was brought by the twin Manifestations. Humanity's selection of a universal language, binary, allows the method of our information storage and now provides understanding via a universal script zeros and ones. One as the sphere, a symbol of unity and zero as the emptiness of space around it.
